How to play Crosswords

A crossword is a grid in which words cross each other. Each word is found with its clue. When two words cross, they share a letter.

The rules

Each word fills a line of white squares: Across words go from left to right, Down words from top to bottom. The number in the first square is the number of its clue. Black squares separate the words.

Some letters are already written to help you. Easy grids: the first and the last letter of each word (as here). Medium grids: the first letter. Hard grids: no letters.

Easy grids use short words (3 to 6 letters), Medium grids words of 4 to 8 letters, and Hard grids longer words (5 letters or more).

An example, step by step

The clues of the example

- 1 Across: A big furry animal that likes honey (4 letters)
- 3 Across: A big cat with stripes (5 letters)
- 1 Down: It floats on water (4 letters)
- 2 Down: Water that flows to the sea (5 letters)

Step 1 – Start with a clue you are sure of

1 Across: "A big furry animal that likes honey" (4 letters). The answer is BEAR. Write one letter in each square.

Step 2 – Use the crossing letters

¹ B	E	A	² R	
			I	
			V	
³			E	
			R	

2 Down: "Water that flows to the sea" (5 letters). Its first letter is already there: the R of BEAR. The answer is RIVER.

Step 3 – Finish the grid

¹ B	E	A	² R	
O			I	
A			V	
³ T	I	G	E	R
			R	

In the same way, 1 Down is BOAT. Now 3 Across already has two letters, T and E, given by the down words: the answer is TIGER. Each crossing letter must fit both words.

Tips

- Count the squares: the answer has exactly that many letters.
- Start with the clues you are sure of, then use the crossing letters for the harder ones.
- If you are stuck, move on to another clue and come back later.
- Write in pencil, so you can correct a letter.

Check your grid

- Every white square has a letter.
- Each Across and Down word matches its clue.
- When you have finished, compare with the solutions at the end of the book.
